

# Tutorial 3

## Using research to develop professionally

# Action Research

# Why is research important?

## Audio 1.1

Using research  
to develop as  
a language  
teacher

"we want to know why we do what we do"  
(Banegas 2013)

"an intention to enhance something that you value (e.g. learning, teaching, development, well-being or understanding)" (unigraz 2017)

### Example I

"I want to investigate how middle school students at an international school acquire art-related vocabulary and apply in their discussions about art.

I want to investigate this topic because I am currently teaching art to middle school students at an international school, and I have noticed that, while my students seem to 'acquire' art-related vocabulary and apply it in structured situations with relative ease, they often do not use this vocabulary when discussing art outside of these focused sessions." (unigraz 2017)

PLAN

ACT

**Interactive 1.1** What is Teacher Action Research?

Teacher Action Research 2015

REFLECT

OBSERVE

How do we do research?

# how to start your research

## intercultural learning

cultural knowledge; intercultural competence; multiperspectivity; globalization; online collaboration; networking; lingua franca; bilingual education

## the use of mobile technologies and innovative teaching methods

digital tools; interactive learning; self-reflection; new challenges; online collaboration; apps for language learning; ePortfolio; ethics and privacy; innovative assessment

## professionalism in language teaching and learning

CPD; reflective practices; digital tools; Ofsted; self-reflection; raising awareness and agency; communities of practice; professional identity

## others

national differences regarding inclusion; the issue of space and mobile learning

any more ideas? ----> share [here](#)

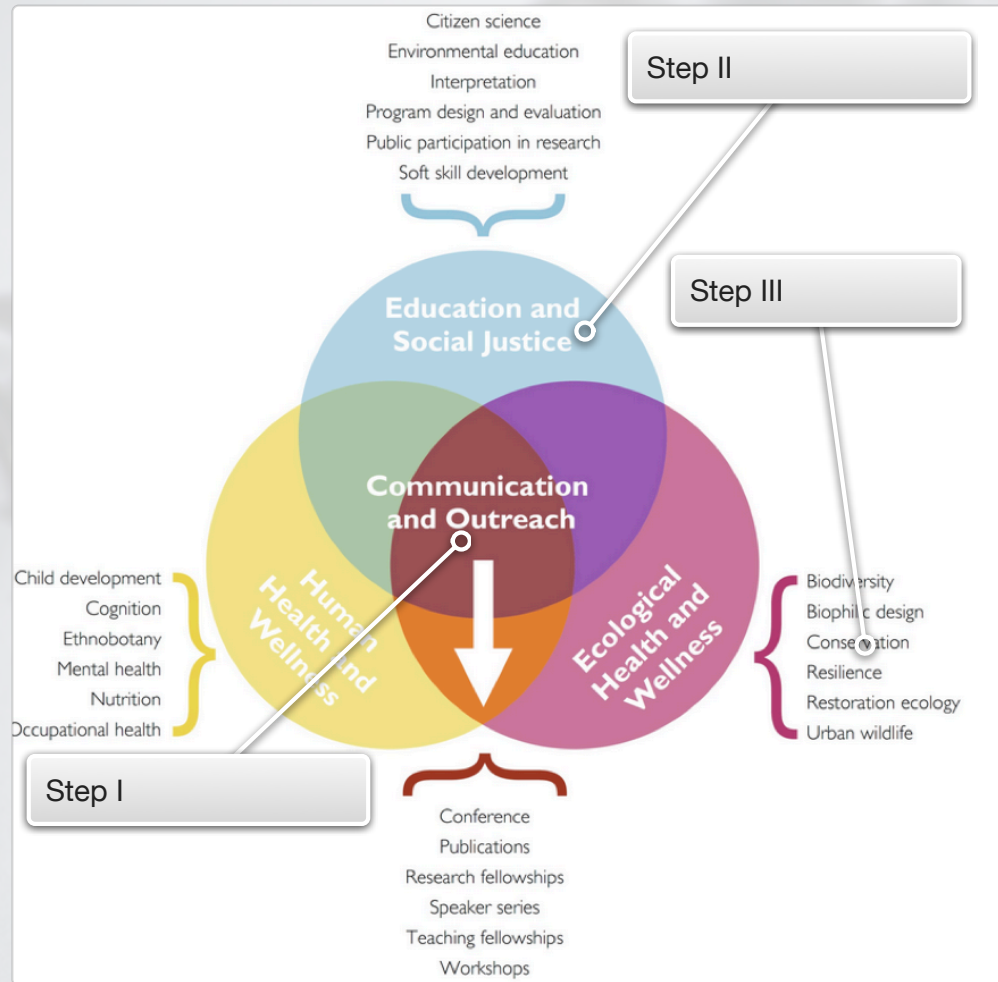

our context: language teaching and learning

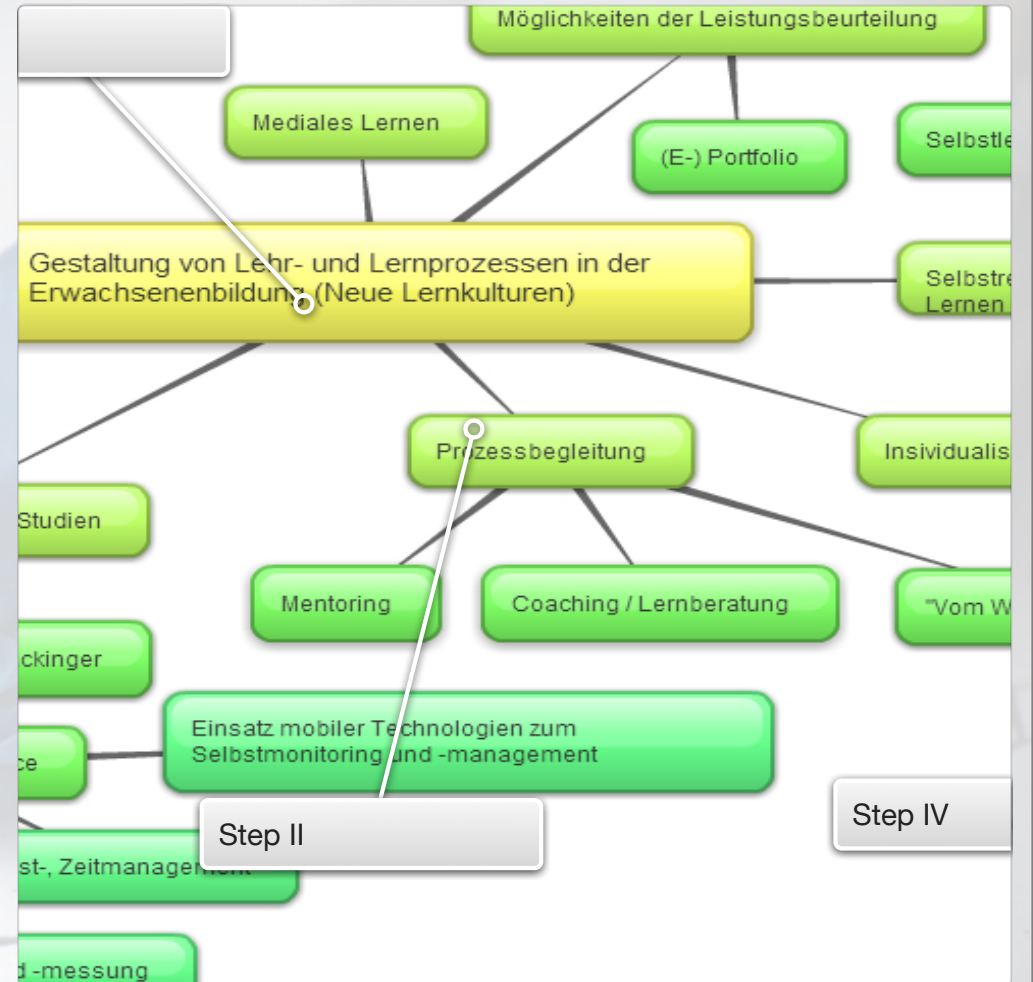

# break down your topic

## Interactive 2.1 Focusing circle

## Interactive 2.2 Mind mapping

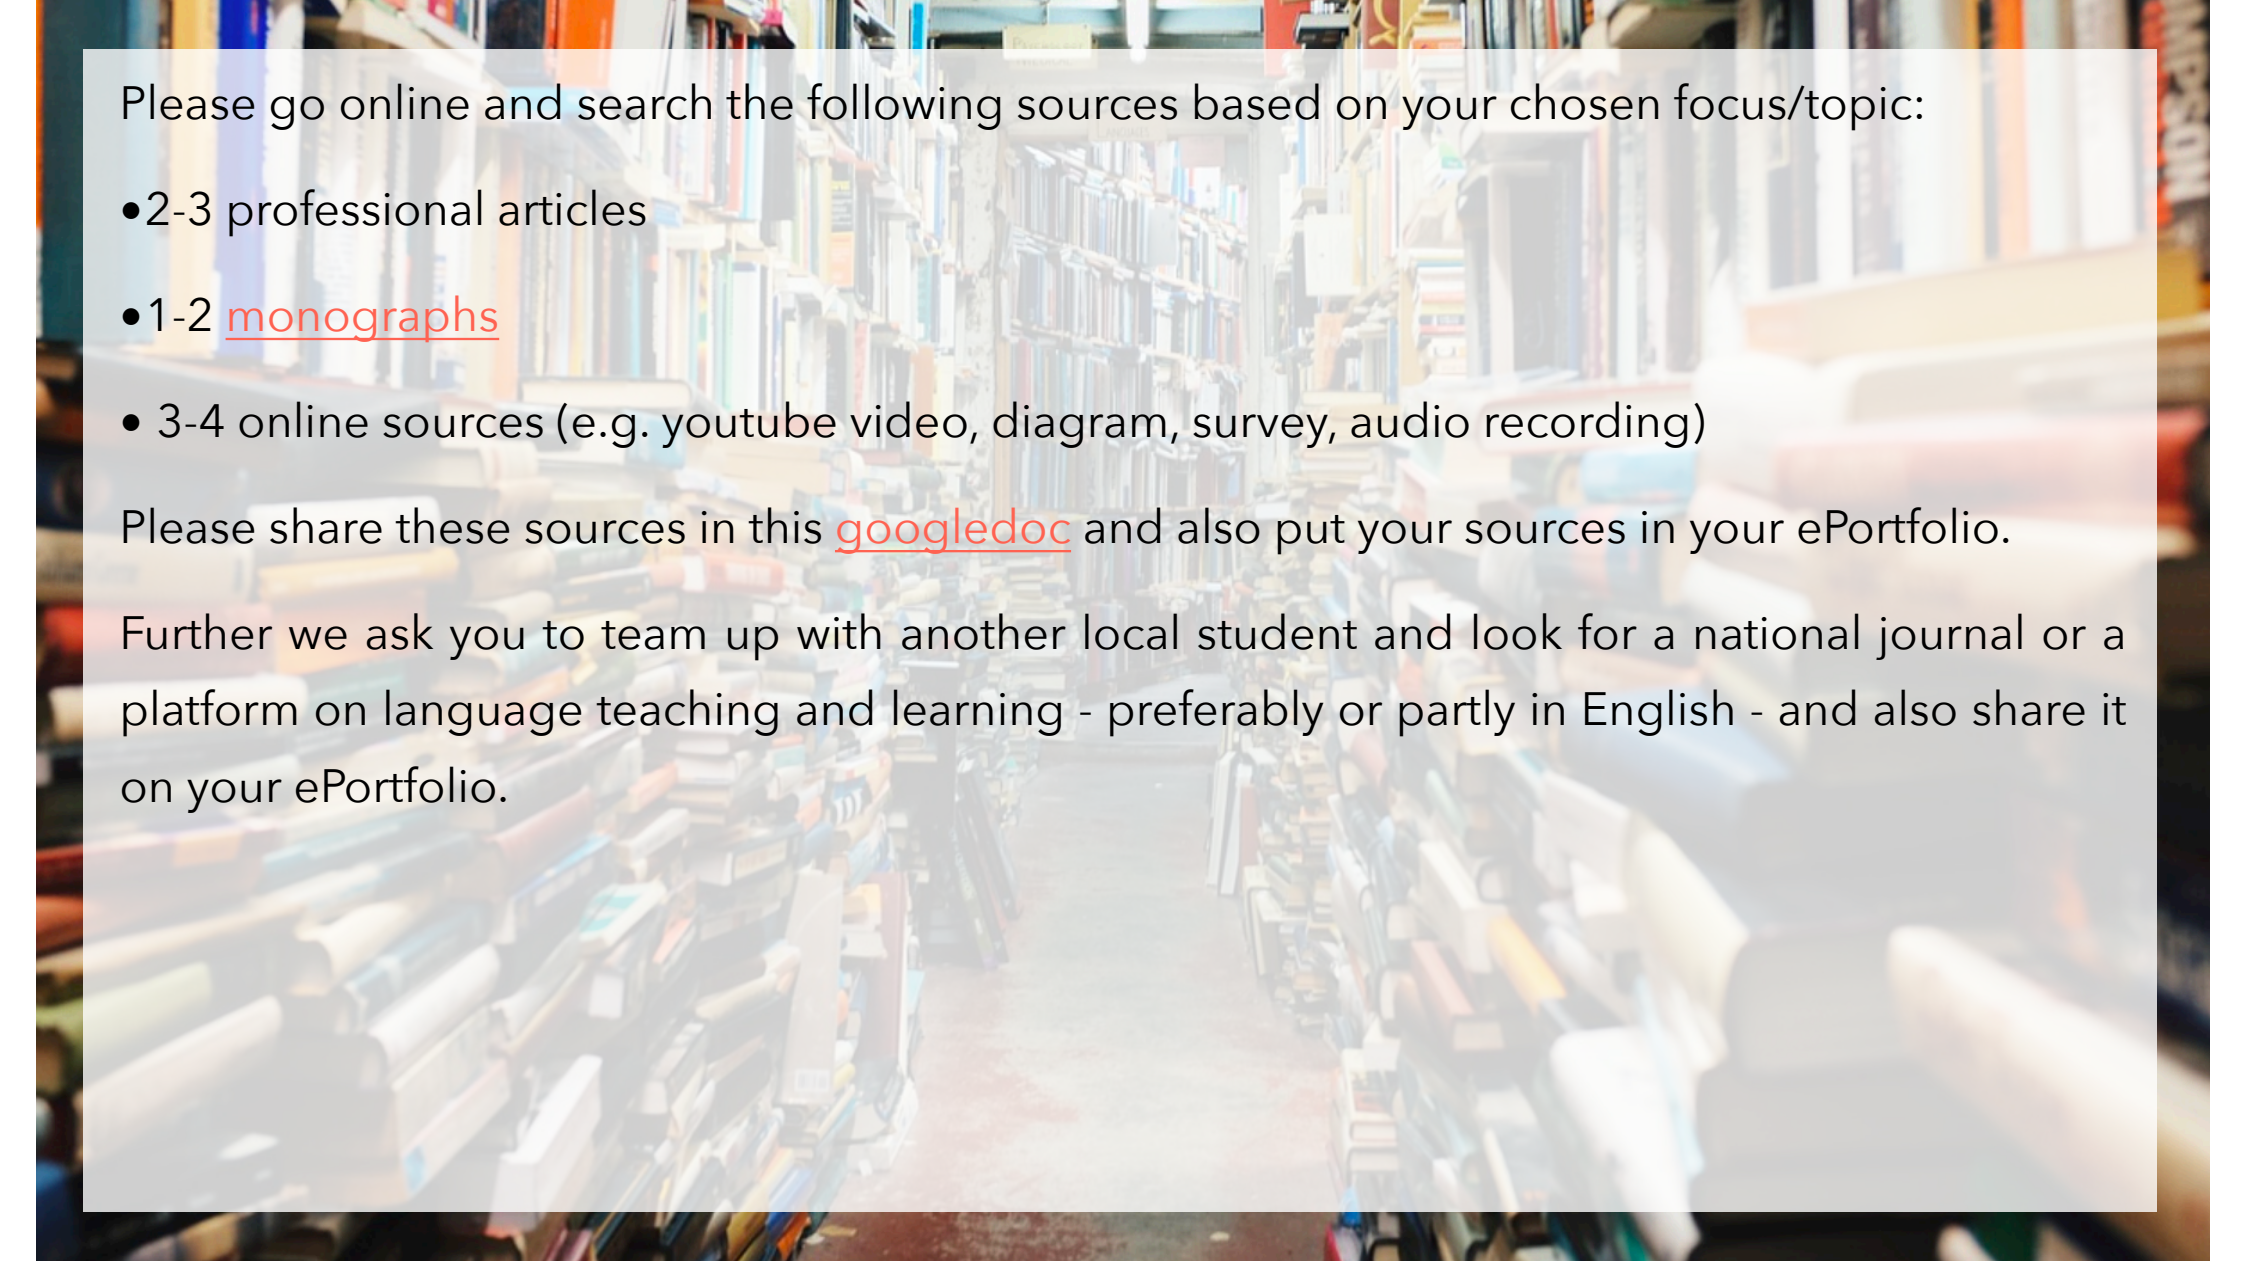

Based on pages 5 and 6, please create either a focusing circle or a mind map on a topic you find interesting or challenging. For a first draft you can choose whether you do it in an analogue or digital way, but we ask you to share an online version on your ePortfolio.

For your focusing circle, we suggest you use either word, powerpoint, pages or keynotes, but you are also welcome to use any other program that you find appropriate.

For creating a mind map we suggest that you either use the programs mentioned above or try an online program such as [MindMup](#) or [Bubbl.us](#). Please also feel free to use any other suitable program. We ask you to upload your focusing circle or mind map into your ePortfolio.

Please go online and search the following sources based on your chosen focus/topic:

- 2-3 professional articles
- 1-2 [monographs](#)
- 3-4 online sources (e.g. youtube video, diagram, survey, audio recording)

Please share these sources in this [googledoc](#) and also put your sources in your ePortfolio.

Further we ask you to team up with another local student and look for a national journal or a platform on language teaching and learning - preferably or partly in English - and also share it on your ePortfolio.

get an overview: a first survey of the literature

**Interactive 2.3** Specify your research topic

The image shows a rounded rectangular icon with a gold-to-tan gradient background. Inside the icon, there are three text input fields, each preceded by the label "Text :". Below the input fields are two radio button options: "Option 1" with an unselected radio button, and "Option 2" with a selected radio button.

To specify your topic even further and to develop a research question, please click on this icon and answer the upcoming questions. Please do not forget to put the answers in your ePortfolio.

specify your research topic

## Interactive 2.4 examples of research questions

## a good research question...

should be a real question  
is well-founded and literature based  
has clear intentions  
avoids being ambivalent

is realistic  
is analysis-oriented and open  
is innovative  
is as short as possible and as long as necessary

## FORMULATE YOUR OWN RESEARCH QUESTION

- Please formulate your ideas according to 'Example I'. Start with writing down your research question.

### Example I

"I want to investigate how middle school students at an international school acquire art-related vocabulary and apply to in their discussions about art.

I want to investigate this topic because I am currently teaching art to middle school students at an international school, and I have noticed that, while my students seem to "acquire" art-related vocabulary and apply it in structured situations with relative ease, they often do not use this vocabulary when discussing art outside of these focused sessions." (unigraz 2017)

- Get together with another local or international student and discuss your research questions.
- After discussing and possibly modifying them, please put your research ideas and your question in your ePortfolio and also share them in this [googledoc](#) (bottom table).
- Please also discuss your research questions with a local lecturer if possible.

# two research frameworks

research framework I  
observation sheet (or VEO)

# Why use observation for data collection?

## Interactive 3.1 Observations

Burden 2018

**Interactive 3.2** example I: Classroom observation in Australia: focusing on teaching strategies and lesson objectives

lesson structure

classroom management

use of language

classroom interaction

# FOCUS?

teaching strategies

use of materials and digital tools

	Q	W	And this is why .....
Preparation			
1.			Lesson plans according to number of students and level.
2.			Clear and specific objectives for lesson.
3.			Selection of equipment and materials according to the objectives of the lesson.
4.			Time planning according to the objectives of the lesson and the activity(s) presented.
Teaching			
5.			Use of teaching techniques according to the objectives (e.g. error correction, instructions, explanations, feedback and evaluation, etc.)
6.			Use and promotion of meaningful communication
7.			Learners actively involved in the class.
Class Management			
8.			Student groupings according to activities.
9.			Use of equipment needed for the class. (e.g. neat and organized use of the board).
10.			Use of materials needed for the class.
11.			Pace and time management through the development of the class.
12.			Ability to deal with occasional classroom management problems.
Self Management			
15.			Punctuality
16.			Friendly and respectful to students
17.			Use of body language, gestures and teaching space as needed
Language Use			
18.			According to student's level.
19.			Tone and volume of voice as needed

example II: lesson observation checklist (Richards 2011, 101)

### Audio 3.1

The focus of the observation

(Richards 2011, 92)

### Interactive 3.3

example III:  
Second Language  
Classroom  
Observation

# collecting data using an observation sheet

# collecting data using VEO

**Interactive 3.4** Video Enhanced Observation - for further information on VEO, please have a look at the Interactive Tutorial 4

Video Enhanced Observation 2015

## Now it's your turn: **DEVELOP AN OBSERVATION SHEET**

Please team up with a local or international student and think about your own experiences: e.g. Have you been observed as a teacher? Or have you observed someone teaching?

Think of a specific scenario. This can be a situation that you have talked about in one of your seminars or you have experienced during your internships.

Try to identify a specific focus, problem or question that comes to your mind.

Based on this, please develop an observation sheet together with your partner.

Bear in mind the reason for why you are using this observation sheet. In this iBook, an observation sheet serves as a research instrument. This means it is a tool to collect data, which can be used for analysis in different scenarios.

Please share your observation sheet in your ePortfolio.

research framework II

interview

WHO  
WHEN  
WHERE  
HOW  
WHAT  
WHY

# interviews for action research

## Interactive 3.5 Conducting a semi-structured interview

Eelderink 2016

Although this interview is from a different context, it can give you a good first idea of what a semi-structured interview can look like. Please have a look at it and try to make connections to the context of language learning and teaching.

# the semi-structured in-depth interview

## Audio 3.2

Semi-structured interviews

(DiCicco-Bloom & Crabtree 2006, 315)

### SOME ADVICE

- structure your interview (e.g. welcoming and appreciation, introductory questions, probing questions, etc.) and note exactly what you want to say

Because it is the most common format for Action Research, this Interactive Tutorial will only introduce the semi-structured interview to collect qualitative data

### Gallery 3.1 example I

## An interview study of the usage of written feedback in English education

The students' and the teachers' points of view

Linnéa Thorsteinsen

Thorsteinsen 2010

**Interactive 3.6** Fridman 2007

ACTION REASERCH STUDY OF A CHILD FROM A CHINESE CULTURAL

BACKGROUND

by

Tatyana Fridman

A Capstone submitted in partial fulfillment of the requirements for the degree of Masters  
of Arts in the English as a Second Language

Hamline University

St. Paul, Minnesota

October, 2007

## Now it's your turn: CHOOSE A SCENARIO AND DEVELOP YOUR OWN INTERVIEW QUESTIONS

### Scenario I

You have found the [Sherrington \(2013\)](#) article online and had a look at the homepage of [King Edward VI Grammar School](#) while looking for schools that have implemented research in their daily routine. As you find this school highly interesting you have contacted the headmaster and arranged an online meeting via Skype for an interview. You estimated that this will take about 1 hour.

### Scenario II

Having done the iBook on the [VEO App](#), many questions came to your mind and you arranged an online interview with the App developer [Paul Miller](#). This interview will take about 1 hour. You would like to use the app for your own professional development and to improve your language teaching practices.

### Scenario III

After you had a look at the different [partners](#) involved in the proPIC project, you found the expertise and field of research of one partner very interesting. You arranged an interview with this partner, which will take approx. 1 hour.

**Please take your time, choose a scenario and develop an interview, based on the information on semi-structured interviews provided in this chapter and on what you find most interesting regarding your research topic. Please upload your interview in your ePortfolio.**

# collecting and preparing the data

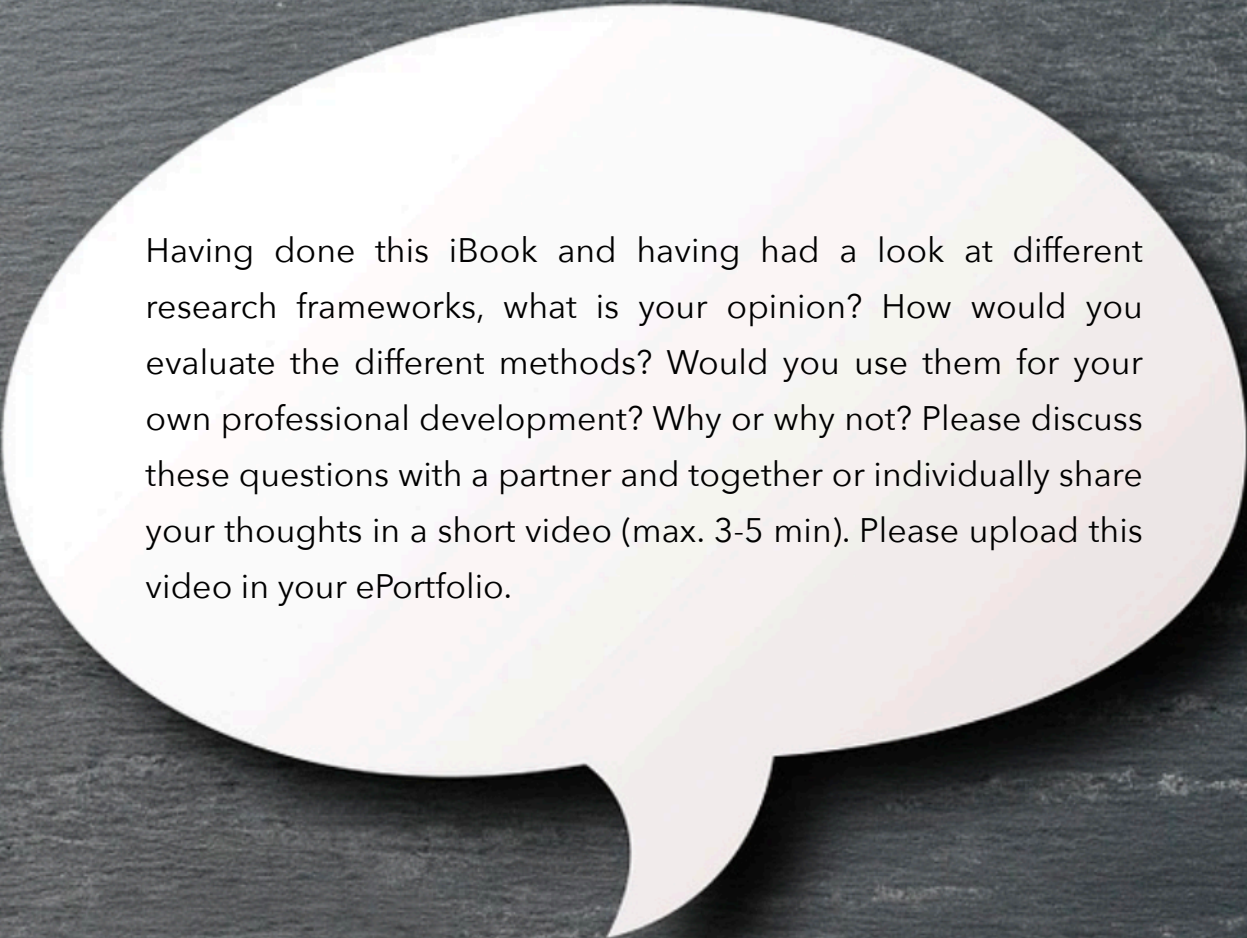

## Data collection

- audio-record the interview (e.g. using a voice recorder, or a recording app on your smartphone)
- take notes (background information)

## Data preparation

- transcribe your recorded interview or significant parts of it
- summarize your data

Having done this iBook and having had a look at different research frameworks, what is your opinion? How would you evaluate the different methods? Would you use them for your own professional development? Why or why not? Please discuss these questions with a partner and together or individually share your thoughts in a short video (max. 3-5 min). Please upload this video in your ePortfolio.

**Interactive 5.1** Last but not least ... something to watch and think about
